## EDUCATION

### De La Salle University

BS Computer Science major in Software Technology

Manila, Philippines

2023 – Present (Expected 2027)

- **Leadership Progression and Involvement:** Vice President of R&D (2025-2026), Associate Vice President of R&D (2024-25), Outstanding Junior Officer (2023-24); Team Leader for HackerCup (2024 Event Ops; 2025 Program Design);

## EXPERIENCE

### Digital Transformation Intern

Philip Morris Fortune Tobacco Corp.

May 2026 – Present

Taguig, PH

- Designing a scalable onboarding framework to accelerate nationwide field-sales adoption of internal digital tools, supporting the company's 100% digitization vision.
- Automating field-operations data processing via Excel Office Scripts on Snowflake extracts, improving KPI monitoring efficiency for regional operations teams.
- Delivering UI/UX, system design, and workflow recommendations across internal and external enterprise applications, maintaining a prioritized enhancement backlog for future releases.

### Software Developer Intern

Siklab Pilipinas

Apr. 2026 – Present

Taguig, PH

- Developed static event websites for Siklab's regional programs (AI for Asia 2026, Enactus Philippines) using Next.js and TypeScript, handling frontend development and production deployment end-to-end.
- Spearheading the full redesign and rebuild of the organization's primary website ([siklab.org.ph](https://siklab.org.ph)), serving as the sole developer across frontend, integration, and hosting.

### Tech Lead and Developer / VP of Research and Development

La Salle Computer Society

Sept. 2024 – Present

Manila, PH

- Oversaw **9 total software development projects** (7 internal, 2 external) for the La Salle Computer Society.
- Led a committee of **22 student developers** through technical initiatives and bridged the team with clients.
- Developed full-stack applications using React.js, Next.js, and Node.js with **97%+ uptime**.
- Administered databases via PostgreSQL, MySQL, and MongoDB for production-level traffic.
- Automated software delivery pipelines using Docker for builds and CI/CD via Github actions for workflows.

## PROJECTS

### LEAP 2025 Website | Node.js, ContentfulCMS, Vitest

2025

- Spearheaded API development while mentoring a junior developer for a university platform catering to **29,000 users and 302 hosted events** of LEAP 2025 with an uptime of **98%**.
- Designed and built the core RESTful API using Express 5 and TypeScript with a layered Controller → Service → Model architecture across 10 resource endpoints.
- Integrated **Contentful CMS** via bidirectional webhook sync across 5 resource types (events, orgs, subthemes, highlights, media), enabling clients to independently update web assets with webhook secret validation and automatic upsert.

### KabuhayanDB (Member Profiling Database) | Node.js, Vitest, SCRUM

2024 – 2025

- Developed an intuitive website for **450+ members** of SKMLHOAI to allow easy member profiling, generative reports, and dues tracking.
- Led a cross-functional team of **9 developers** as **Product Owner and Scrum Master**, facilitating **Agile Workflows**.
- Developed **80%** the API codebase, featuring secure authentication, automatic report generations, and more.
- Exhibited **Test-Driven Development (TDD)** using **Vitest**, significantly reducing post-deployment bugs and heavy appliance of **CI/CD workflows** via Github Actions.

### Student Government Annual Recruitment Website (SGAR) | Next.js, S3 Buckets

2025 – 2026

- Architected a centralized directory for student government units catering to **1,750 students** built on Next.js.
- Optimized system using **AWS S3 buckets** via the organization's developed CMS for the website's assets and refactored code for multi-year reuse.
- Maintained application uptime at above **97%**.

## TECHNICAL SKILLS

**Languages:** Python, C, Java, JavaScript, TypeScript, R, SQL, HTML/CSS, Markdown

**Frameworks/Libraries:** React, Next.js, Node.js, Django, Express, Jest, Vitest

**Databases:** MySQL, PostgreSQL, MongoDB, SQLite, Redis

**Developer Tools:** Git, Contentful, Docker, CI/CD (GitHub Actions), S3 Buckets, Neovim, Opencode, Openspec

**Methodologies:** Scrum, Agile, TDD, Product Ownership, Project Management
